SOLAR-RIPP® Distributing/Manifold Pipe, gaskets
 50mm outside diameter, also available as 75mm, 90mm, 110mm, 125mm, 140mm ... diameter for bigger systems used on public and hotel pools. Plug gaskets easy in the two face ends of the tubes.

SOLAR-RIPP® Tube
 Advanced 25mm rip tube with optimized geometry and updated materials | 25mm outside diameter for minimum inner pressure loss and minimum auxiliary pump energy required | Made from special plastic that is resistant to UV, seawater and chlorinated water | Lengths of 25m, 50m, 100m, 125m, 150m, 175m, 200m and 250m are available.

SOLAR-RIPP® Connector NEW
 Delivered with two flexible hose connectors and clamps, the new header connector ends are made by a unique construction - small glass fibre particles inside the advanced composite material provide stiffness, a chequer surface and a tapered shape provide a high safety joint to the pipework.

SOLAR-RIPP® Clips
 For rapid assembly with **non-slip safety Updated construction feature** to fix the solar tubes, the clips provide optimal look of the solar system | Clips are placed parallel every one metre for flat mounting (standard package contain), or every 50cm for use on sloping roofs, or every 33cm for use on fencing and walls | Made from an extremely UV-resistant special plastic material and including joints to fit them together.

Advantages ★★★★★

- 3D Rib Design**
- smart geometry
 - solar tube surface 320%
 - maximum thermal efficiency
 - minimum pressure loss, Ø 25mm
 - turbulent fluid flow for max. heat
 - vacuum resistant
 - walk-on suitable
 - flexible and collable

- Intelligent Joints**
- premium design
 - toolless joint
 - maintenance free
 - extremely pressure resistant
 - no corrosion, no metal parts
 - easy connections only by hands
 - DIY suitable
 - removeable joint

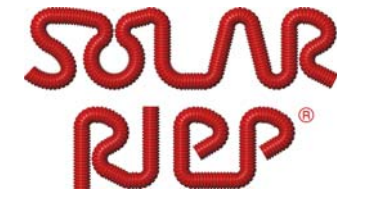

- Aerospace Plastics**
- advanced materials
 - UV-resistant
 - Scandinavia and Africa climate tested
 - chlorine and salt resistant
 - rodent bite resistant
 - special material composition
 - up to 50 years lifetime
 - original parts contain embossing

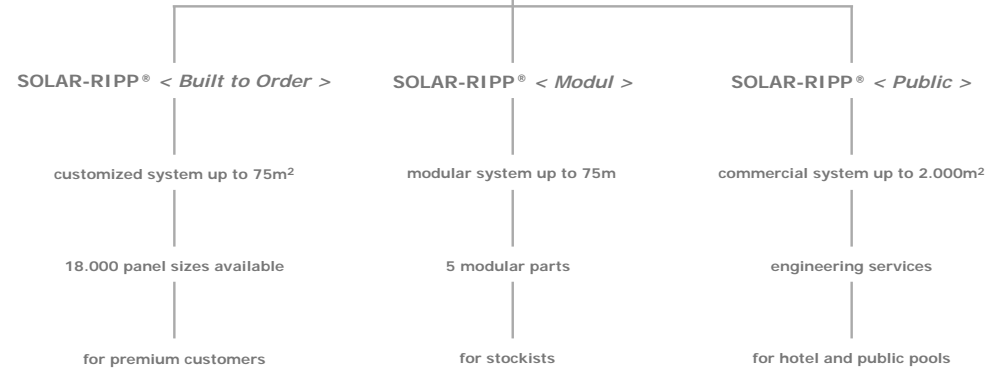

SOLAR-RIPP® < Built to Order >
 SOLAR-RIPP® manufactures any size of solar absorbers customized. Please communicate width and length of the available rectangular area, the sun reach. (pergola, flat/sloping roof, fence or wall, ground). Solar size calculation formular: solar area = 0.5 to 1.0 x pool surface

Solar Pool Heater

SOLAR-RIPP® Solar Pool Heater

SOLAR-RIPP® is certified following DIN EN 12975-1, 2 at approved DIN CERTCO testing laboratory TZSB / TzeS (DE)
