
EVERYONE LOVES A HEATED SWIMMING POOL DURING WINTER!

Dear Pool Owner,

Solar Pool Heating use **FREE** energy from the sun to provide you with a cost-effective and environmentally conscious way to keep your pool warm and inviting during the colder winter season.

Solar Pool Heaters are great for recreational pool use and are recommended for those who are comfortable with pool water temperatures ranging from the mid to high 20's.

Our offered **SOLAR-RIPP®** pool heating systems are an ideal step forward to conserve nature's precious resources, while saving you money on utility bills.

It is amazing to understand that a standard pool with **60,000 liter** water volume consumes approx. **25,000,000.00 Watt** of electrical energy over the winter season between November and April (180 days). In today's world where everybody is talking about sustainable energies, you too can make the difference and be part of the important carbon footprint campaign, reducing Co² emission.

SOLAR-RIPP® will give you years and years of comfortable pool water for a one-time installation charge. Make your swimming pool an Energy Smart Pool; enjoy immediate savings and also a higher value for your property!

SOLAR-RIPP® – A Bright Investment for a Carefree Pool Enjoyment

- **Reduce your electricity bill**
Once you install your **SOLAR-RIPP®** system, heating your pool becomes free of charge! You will not have to worry about the cost of enjoying a warm, comfortable pool during wintertime. It is a one-time investment that slashes your electricity bills and pays for itself in a few years.
- **Help the Environment, Fight Pollution and Global Warming**
Solar energy is sustainable and cost effective, plus it does not pollute the environment or contribute to global warming. Be proud of being environmentally responsible!
- **Low Maintenance and Reliable Performance**
SOLAR-RIPP® solar heating systems require next to no maintenance and therefore are less expensive to operate compare to heat pumps or other heating systems. The system lasts several decades (aerospace material) and it is covered by 20 years warranty. It virtually becomes a permanent part of your pool and your home settings.

SOLAR-RIPP® - Transforming Sunlight into Pool Comfort: How it Works?

Simply explained, your pool water is 'detoured' from the pool filter to the **SOLAR-RIPP®** system during daily filtration cycle, heating the pool free, with no additional operating costs.

Versatility and Easy Installation

Available sizes are starting from 5sqm – 2,000 sqm, rectangular or irregular shapes to fit any pool in any residential settings. The material is weather proof and corrosion insensitive.

SOLAR-RIPP® @ LANGE LLC makes it Easy

Our experienced consultants will provide you step-by-step assistance with Evaluation & Design, Installation & Inspection, as well as After-Installation support. We will ensure an installation that not only functions optimally but also looks attractive and blends harmoniously with your home surroundings.
